SUMMARY

M.Sc. Software Engineering candidate (graduating July 2027), with 3+ years of professional experience developing backend, web, and AI applications through 5+ freelance projects and 3 internships. Experienced in building multitenant platforms, REST APIs, AI integrations, and automated deployment workflows using Go, Java, TypeScript, Python, React, Next.js, NestJS, PostgreSQL, and Docker.

TECHNICAL SKILLS

- **Languages:** Go, Java, Python, TypeScript, JavaScript, Python
- **Frontend & Mobile:** React, Next.js, React Native, Android Java, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, NestJS, Spring Boot, Django, FastAPI, Gin, Go Fiber, REST APIs, gRPC, Java RMI
- **Databases & Caching:** PostgreSQL, MySQL, MongoDB, Redis, SQLite, Prisma
- **Cloud & DevOps:** Docker, Kubernetes, Terraform, GitHub Actions, Azure, AWS, Linux, Kafka
- **AI & Automation:** RAG, AI Agents, Tool Calling, MCP, Vector Databases, Model Fine Tuning, Dialogflow
- **Testing & Tools:** Jest, Vitest, Playwright, Git, Postman, Figma

EDUCATION

Higher Institute of Applied Sciences and Technology of Sousse — *Sousse, Tunisia*
Master's Degree in Software Engineering — 2024 – 2027 (Expected)

- Relevant Coursework: Distributed Systems, Artificial Intelligence, Software Architecture, Web Development.

Higher Institute of Applied Sciences and Technology of Sousse — *Sousse, Tunisia*
Bachelor's Degree in Computer Science — 2021 – 2024

- Relevant Coursework: Algorithms, Data Structures, Operating Systems, Databases, Computer Networks.

PROFESSIONAL EXPERIENCE

Independent AI/Software Engineer Freelancer (Upwork) — *Remote / Sousse, Tunisia*
Software Engineer — Sept 2024 – Present

- Delivered 5+ freelance AI and full-stack projects for international clients, converting business requirements into production-ready JavaScript/TypeScript services and REST API features.
- Built marketplace-style backend services, API integrations, and data handling workflows for platforms with Airbnb-like booking and property-management requirements.
- Owned client-facing delivery from requirements clarification to implementation, integration, and handoff using modern backend frameworks.

Savagesse — *Remote*
Software Engineer Intern — July 2026 – Aug 2026

- Developed SavAcademy, a multitenant football academy management SaaS using Next.js, React, and PostgreSQL, supporting players, teams, attendance, payments, and competitions.
- Built a public frontend serving multiple academy websites from one Next.js deployment using hostname based tenant resolution, with French and Arabic RTL support and tenant isolation tests.
- Implemented automated CI/CD workflows with blue green container switching to support safer application deployments.
- Developed an AI assistant integrating 23+ domain tools to query and interact with academy data, with live visibility into tool execution.

Insimplo *Monastir, Tunisia*
AI/Software Engineer Intern July 2025 – Aug 2025

- Fine-tuned a lightweight Gemma AI model to generate user stories and subtasks from feature descriptions across 4+ delivery tracks, including backend, frontend, and UI/UX.
- Built a .NET desktop application with SQLite storage, a multi-step wizard, export workflows, and JIRA integration for product-planning handoff.
- Containerized the workflow with Docker and supported Azure deployment during a 2-month internship delivery.

Proxym-IT *Sousse, Tunisia*
Software Eng Intern Feb 2024 – June 2024

- Built a crowdfunding platform connecting 2 audiences: startups pitching investment opportunities and investors evaluating them.
- Implemented web, mobile, and backend features using React, React Native, NestJS, PostgreSQL, Docker, and Azure.
- Integrated DialogFlow and Redis to support conversational workflows, caching, and improved platform scalability.

PERSONAL PROJECTS

SwiftMerge – Email Automation Platform | *Go, Gin, React, PostgreSQL, Docker* 2025

- Engineered a multitenant email automation platform featuring personalized campaigns, reusable templates, CSV recipient management, and Gmail API integration.
- Developed concurrent email processing using Go worker pools, with campaign pause and resume controls, rate limiting, and secure user data isolation.

ISSATSO Academic Management System | *NestJS, React, PostgreSQL, Prisma, Redis* 2026

- Developed an academic management platform supporting student enrollment, curriculum administration, grade management, and academic deliberations across four user roles.
- Implemented JWT authentication, WebAuthn, role based access control, and an AI assistant with tool calling capabilities.

TapNShow – Meeting Coordination Platform | *Next.js, TypeScript, Supabase, PostgreSQL* 2026

- Developed a meeting coordination platform supporting team workspaces, member management, meeting invitations, and attendance workflows.
- Implemented backend infrastructure for Gmail invitations using a PostgreSQL outbox, secure invitation tokens, sender quotas, and automated integration tests.

URL Shortener – Link Management Platform | *Go, Gin, React, PostgreSQL* 2024

- Built a link management platform with Google OAuth authentication, customizable QR code generation, click analytics, and a personalized management dashboard.
- Embedded the React frontend into a Go executable, serving the application and its REST API from a single deployment.

Drawly – Collaborative Whiteboard | *Java, Java RMI, Swing, PostgreSQL* 2025

- Built a collaborative whiteboard with synchronized drawing across multiple clients using Java RMI and independent drawing rooms.
- Implemented persistent drawing sessions using PostgreSQL, enabling users to restore canvases, customize drawing tools, and export drawings as PNG files.

LEADERSHIP & COMMUNITY

Google Developer Groups on Campus ISSATSo *Sousse, Tunisia*
Team Management Member Nov 2022 – Present

- Developed a campus URL management platform using Go and React, featuring Google OAuth authentication, customizable QR codes, and link analytics.
- Collaborated with GDG members on Hackwarts 2.0 and Choufli Hal 2.0 hackathon registration portals, and initiated TapNShow to address meeting coordination needs.

LANGUAGES

Arabic: Native | **English:** Professional proficiency | **French:** Elementary proficiency
